## Cover Letter

I am a Filmmaker, Editor, and Actor working primarily in the DMV area. Starting right after High School, I was trying to get as much professional experience as possible in the Filmmaking/Acting world. Since then, I have been a part of several professional Film productions in various roles. I have a drive to constantly do better, and that is applied to this competitive business by never settling, and always wanting to improve.

Additionally, I have managed to get a lot of my own experience with personal projects, and my digital advertising company that I own and operate. This company not only pays the bills, but allows me to gain experience in many different corners of skills. From Time Management, to Budgeting, and even Leadership; the experience I have gotten running my own company is second to none.

As for my technical skills. I have been mastering Adobe's Softwares, especially Adobe Premiere Pro since I was in Middle School. I admire the art, rhythm, and creativity that editing gives an artist. I always edit my own projects, and am a top choice for editing projects in my area due to my skill set. I am constantly learning new skills that can be applied to the post-production process.

I am an ever-growing filmmaker, actor, and editor who enjoys expanding his craft. In the hopes of pursuing entertainment full-time, the skills that I have obtained through my professional experience over the past year has brought me closer to that goal day by day.
